# RT3_2022 Catalogue Overview

KYOCERA

Why choose Kyocera Document Solutions?

Smarter Partnerships, Smarter Solutions

We partner with you to create competitive advantage, turning information into knowledge.

A valuable partner that grows together with you

We deliver products and services with the "Customer-First" principle as our top priority. For more than 20 years we have minimised environmental impact by developing long-life, low-waste printers and multifunctional products.

Customers look for borderless streamlining of operational processes and the need for quick decision-making has increased. The volume of documents handled on the business front line has grown exponentially. Issues involved with document processing are multiplying.

We evolve as your needs change

Our strong foundation of hardware, sales and maintenance, extensive consulting services and business applications enables us to understand your needs and solve document-related issues through our Total Document Solutions approach.

Kyocera Document Solutions will continue to grow together with you, and be a partner that will contribute to your business growth. In essence, we combine professional expertise with a human kind of partnership.

We support all your business needs

At Kyocera Document Solutions, we use our innovative ideas, award-winning

hardware and smart software to deliver value, overcome your challenges and put your organisation's knowledge to work for competitive advantage.

- **Paper and documents are just the start**
  Our Total Document Solutions approach looks at every part of your business, so you work smarter.

- **We help you solve business critical challenges**
  This includes reducing costs, automating business processes and increasing productivity. Our Research and Development meets your changing needs.

- **A powerful business model designed around you**
  Our award-winning ECOSYS printers and MFP products deliver lower costs, reliability and environmental benefits.

- **Lower your TCO**
  Kyocera is renowned for our industry lowest TCO thanks to our end-to-end digital imaging production portfolio.

- **Unleash the full potential of hardware**
  Our business applications and consultative services optimise document workflow, unleashing the potential of hardware.

- **We're global and always personal**
  Benefit from exceptional service and tailor-made solutions that best support your business — regardless of size.

Powerful, Reliable and Economical

Whether on your desktop or in office production - be it in colour or black and white: with Kyocera, you always achieve the best possible print quality while easily controlling your output costs.

Kyocera devices and their components have been designed to be extremely reliable and highly economical. And since you can complement many of them with various options at anytime, you can be sure that you always have a system fitted to your needs by your side. Whatever you need to print, copy, scan or fax - the numerous finishing options for our multifunctionals will provide you with a professional result.

Keeping our customers at the heart of what we do, Kyocera ensures that only the best-of-breed software solutions are used to add strategic value to your document solutions.
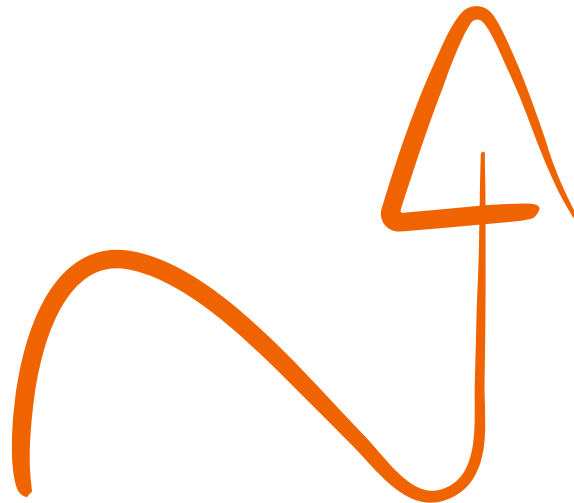

Our Product Range

We support your end-to-end digital business needs

At Kyocera Document Solutions, we use our innovative ideas, award-winning hardware and smart software to deliver value, overcome your challenges and put your organisation's knowledge to work for competitive advantage.

Award-winning printers

Our award-winning printers and multifunctional products offer superior cost efficiency, intuitive controls, reliability and environmental benefits.

Flexible software that fits your business

Our business applications expand the capabilities of your printers, improve security, simplify workflow and give you an edge.

Long-lasting consumables

For optimum performance use Kyocera genuine toner, with ceramic cleaning beads to ensure the printer drum stays clean and particle free.

KYOCERA Mobile Print Application

Access your MFP & Printer functions from your smartphone. With the the popularity and capability of smartphones and tablets continuing to rise, KYOCERA Mobile Print (KMP) application provide on-the-go workers with an added level of flexibility and convenience for Kyocera device operation.

Laser Printers and Multifunctionals

ECOSYS stands for ECOnomy, ECOlogy and SYStem solutions. This concept is unique to Kyocera and is based on our ceramics technology expertise. ECOSYS provides reliable imaging solutions with incredibly durable long-life internal components, highly economical running costs, and significantly less waste during their lifetime.

The long-life components, especially the drum and the developer unit, hardly ever need to be replaced, meaning the devices have exceptionally low printing costs for their class. As toner is the only consumable, waste is reduced by up to 75% compared to other printers in their class. Recycling is also more efficient as Kyocera's toner cartridge comprises only 4 components compared to a conventional toner cartridge that can have as many as 60 components.

For easy and problem-free network integration, most ECOSYS devices have a common operating platform with standard controllers and drivers - significantly cutting the IT workload. Paper handling options are also universal across the respective product lines.

Multifunctionals

Print, copy, scan and fax. TASKalfa multifunctionals offer exceptional productivity through outstanding speed, powerful controller technology and professional utilities. For most of the devices, functions are accessible via a large, colour touch panel with intuitive controls and menu structure.

Their long-life components also guarantee exceptional reliability and minimal downtime. Most of the devices can be complemented with a range of intelligent technical features, as well as paper handling and finishing options, to improve their operating efficiency even further.

What's more, Kyocera's software development platform HyPAS™ for personalised business applications allows you to seamlessly integrate your MFP into your existing business workflow. Managing your document output has never been easier!

Software

|			
Configuration and deployment tools OEM print and device management tool	MyQ		The main objective of the MyQ system is to offer a universal tool providing all services related to print, copy, and scan in one package. The flexibility of the MyQ system allows the customer to only use functions they currently need and expand it easily any time in the future, if required. MyQ objectives, complete monitoring of printing services, print environment optimization, Print, copy, and scan accounting and Job management/Pull Print functionality/Scan management.
Configuration and deployment tools OEM print and device management tool	Papercut		PaperCut MF is a comprehensive print management system designed to seamlessly monitor and control your resources with easy to use administrative and user tools that can be securely accessed from anywhere on the network though a web browser. Print management requirements vary from organization to organization, and often change dramatically within an organization over time. PaperCut NG/MF is designed for flexibility and scalability and can be configured to meet your print management needs now and in the future. It is used in a wide variety of environments ranging from universities with large printer fleets supporting over 100,000 users to smaller organisations that track printing for a fewer than 50 users on 3 or 4 printers.
Basic optical character recognition (OCR)	KYOCERA Capture Manager		KYOCERA Capture Manager (KCM) is the definitive solution which prepares your business for the beginning of its Digitisation Journey. KCM eliminates the time and difficulty of manually capturing and distributing information to your business systems. With KCM, complex and tedious scanning becomes easy and straightforward. This is achieved using an easily customised workflow method, and with the correct business rules in place, the captured information can be made available and accessible to your entire organisation. KCM enables Decentralised Scanning so that you can use your existing Multi- Function Products and equipment for in-house scanning, which makes the outsourcing of the task completely unnecessary.
Advanced optical character recognition (OCR) Basic ECM/document workflow application Connector to integrate MFP into client ECM/workflow systems Cloud connectors to various ECM	ScannerVision Scan for You		ScannerVision is a solution to automate document workflows, which captures, processes and stores scanned documents, as well as documents generated by other applications. Every document that goes to ScannerVision will go through these 3 primary functions. **Capture** - Determines where documents come from (MFP, Desktop Modules/Clients, Hot Folder, E-mail, etc) and how additional information related to the document, or metadata, should be retrieved. **Process** - Determines what is done to the document. This could include barcode reading, recognizing texts with the help of Optical Character Recognition (OCR), conversion to another format, and much more. **Store** - Determines where and how the document should be saved, which could be another folder on the network, a database, as an e-mail attachment, a Cloud Storage such as Dropbox or Google Drive, or a Document Management System such as SharePoint, Laserfiche or NetDocuments.

Software

Network or internet-based fax (per fax)	Smartfax		SmartFax connects your MFP to your fax server and enables to use the MFP like a regular fax machine. Users only have to enter the fax number or select it from the address book. There is no need to enter prefix or suffix or other fax server parameters. Additional fax cards or cables are unnecessary, and there are no monthly costs for the devices as all faxes are sent through the fax server. SmartFax also greatly simplifies the changing of file format, page size, resolution, duplex or simplex and other scan settings, making scanning easy and fast for everyone.
Brand-independent print and device management tool	Kyocera Fleet Sevices		KYOCERA Fleet Services maximise your print fleet's potential without the need for costly onsite visits. With improved visibility comes less downtime and a better customer experience. Also, with Kyocera devices, remote management is possible.
Basic optical character recognition (OCR)	Scan Extension Kit (A)		Scan Extension Kit (A) is an optional add-on to our TASKalfa A3 MFP that scans ordinary documents and converts them to searchable, editable PDFs using embedded Optical Character Recognition (OCR).
iCONVERT MPS			iCONVERT dynamically transforms AFP reports into a variety of other print languages and routes the resulting data to distributed network and production printers, archiving systems and viewing stations. iCONVERT dynamically transforms IPDS data received from any AFP application into a variety of output formats. The output is ideal for printers and archiving products that do not support AFP applications.

Software

Content Services Solution: Managed Document Services
Enterprise Content Management (ECM)

Automate your predictable, repeatable processes. Certain processes such as accounts payable, accounts receivable and the employee hiring has standardised outcomes and include repetitive steps, which can be automated based on logical decisions. These are areas that can be automated.

The value of ECM goes way beyond simple scanning. Capture all important content - paper, electronic and data - into one system with limited human intervention or data entry errors.

Easily integrate with other applications and eliminate switching between screens to find the right information, also eliminating errors caused by manual data entry.

With large volumes of content existing in structured and unstructured formats and in digital and physical copies, tracking and storing this information becomes a time-consuming and labour-intensive effort that impacts productivity. Easy storage and retrieval of data increases efficiency and productivity.

Securely access important information quickly and easily. Anyone who needs content should be able to access it easily in a centralised location, wherever, whenever.

Provide real-time insights in a centralised location into the status of processes, the completeness of records and the health of the system — allowing for prompt and informed decision making.

Kyocera Toners

Kyocera Original Toners

Every business wants to save money, but some cost-cutting measures are counterproductive and may cause more harm than good.

This is why Kyocera has spent decades developing technology that consistently delivers lower running costs than our competitors. Toner is not a "one size fits all" consumable and there is only one supplier who can deliver the quality, economy and reliability you expect when you purchase a Kyocera device.

Once your business has taken the first step to lowering running costs with Kyocera devices, it may seem logical to go one step further by using non-original toner. However, the use of non-original toner can jeopardise:

- **Economic and cost-saving targets**

- **Health risk associated with the non-original toner**

- **Device durability**

- **Document quality**

- **Procurement and administration procedures**

All Kyocera devices are designed with the environment in mind. We aim to minimise the impact of our products on the planet by reducing the quantity of raw materials contained within them. Kyocera's cartridge-free print technology reduces the number of components in the toner system by more than 85% on average, consequently reducing the manufacturing and recycling impact of the device.

BRINGING COLOUR TO RECYCLING

Eco-friendly toner
Our toner 'fuses' on the page and prints at a lower temperature, reducing printer power consumption by up to half.

Toner Take-Back Service
Kyocera offers a returns service for all used, genuine Kyocera toner cassettes.

Kyocera Document Solutions has championed innovative technology since 1934. We enable our customers to turn information into knowledge, excel at learning and surpass others. With professional expertise and a culture of empathetic partnership, we help organisations put knowledge to work to drive change.
